

PARAGRAPHS CONCERNING MICHIGAN

PARAGRAPHS CONCERNING MICHIGAN

(By Ed. A. Nowack.)

Lansing, Mich., Oct. 2.—Frank Rogers, highway commissioner, has some interesting figures on population, territory and trunk highway mileage allotted some sections in Michigan. Says he: "According to the census of 1920 the five counties of Wayne, Macomb, Oakland, Washtenaw and Monroe have a population of 1,392,181 which is 38 per cent of the entire population of the state."

If another tier of counties bordering the above five counties just noted, is added, comprising the counties of St. Clair, Lapeer, Genesee, Livingston, Jackson and Ingham, we have 47 per cent of the state's population and if to that group we add Ingham which touches the northwest corner of Livingston, we would have almost exactly 50 per cent of the state's population and 60 per cent of the state's valuation of 1923.

"In contrast it is interesting to note that the original trunk line mileage allotted to the first five counties mentioned, by the act of 1923, was only 217.2 miles while 5 and 2.3 per cent of the total trunk line mileage of the entire state and this is now expected to serve 38 per cent of the state's population and nearly 50 per cent of its valuation. When one considers the facts just recited it is not strange that there is real demand for the immediate improvement of such main arteries of travel as Grand River road, reaching from Detroit to Lansing, Widen Woodward from Detroit to Pontiac, Grand Gratiot, reaching from Detroit to Port Huron, the new Detroit Toledo road as well as the additions to other important and heavily traveled intermediate highways between."

The Department of the Interior, in a pamphlet sent to state departments, declares that the millions of automobiles, motorcycles, motorboats, aeroplanes, and other gasoline driven apparatus, and motor cars of this kind, in July than in any previous month in the nation's history. Domestic demand for gas in July was 704,030,822 gallons, representing an increase of 107,000,000 gallons over the figures for June. Daily average demand for gas for July was 25,612,898 gallons, and an increase of 11.9 per cent over June.

After 27 years William J. Oberdorfer, of St. Joseph, Minn., county, has stepped a comeback for the Michigan legislature and he will be one of the members. He served in the legislatures of 1897-99. He is 70 years old and very active.

According to late reports reaching Lansing there will be but one woman member in the house, Mrs. Cora Reynolds Anderson, of Lansing, who succeeds Pat O'Brien, veteran of Iron River. Isabelle Kinch, of Grindstone City, Huron county, opposing Gus Braum, seeking re-election, was at first reported winner. Forty seven of last years members are returned. Among them is Nelson Farrier, Hillman, one of the house veterans, last year chairman of the ways and means committee. Former house members among the new faces to appear in 1924, are DeBeer, Kent, J. Herbert Read, Manistique, Fitch, Mason, Oberdorfer, Menominee, Gowan, St. Clair, Sinko, Washtenaw.

Did you know that? The Michigan Electric Railway company for 1923 had net increase for passenger traffic for all divisions of 272,074 passengers.

A Kalamazoo concern will place on the market a moth proof paper designed to protect foodstuffs. Michigan has but seven of the 167 piano manufacturers in the nation. New York tops the list with 68 to its credit and Illinois second with 38. The 187 makers manufactured 328,185

pianos in 1923, valued at \$103,586,738. There were 22,096 wage earners in these plants.

The Manistee & Northwestern road, for whose abandonment application has been made, has 182 miles of Main line exclusive of switchings and spurs. Michigan's greatest peach crop shipments usually total 1,800 cars but due to the crop failure this year it is estimated that less than 100 cars were shipped.

Berrien county is the state's banner peach growing county. Normally this county markets 1,000 carloads of peaches.

CO. NURSE BUSY VISITING SCHOOLS

(By Mrs. Squires, Co. Nurse.)

Nine rural schools have been examined and at eight of them nearly all the homes were represented by at least one parent, and in one school all parents were present, and practically all the babies were present. Babies from 3 months to 4 years were examined. All the parents appeared to enjoy the meetings, and we are planning to have some more before the roads close.

Two cases of illness were found but both were carefully isolated so that whatever it might be it would not spread.

Besides the work in the county the nurse is in the school office every morning from 8 to 9 o'clock, and at the Health Center on Saturdays from 2 to 5 p. m. Her telephone number is 1002. When not in the country she may be found before 8 a. m., at noon usually, and from 5 to 6 p. m. or later each day by visiting 1002.

There are a few children reporting who have been home with colds and intestinal disturbances. The parents can help the nurse greatly by enforcing and reminding the children of the clean mouth and throat rule, especially when they are ill. We are trying hard to reduce the absence number to the minimum. The parents can assist in this by helping the nurse with the teaching of health habits.

Following are a few health pointers upon which particular stress is being made daily:

Use tooth brush daily to prevent the mouth being a culture media for disease.

Use the handkerchief to keep any germs from spreading to others.

Removal of sweaters and coats in school room so skin can keep body regulated as to temperature.

Use of toilet soap and water for the hands especially after going to the toilet.

The hands are germ carriers. Use the soap and water freely and you need not worry. The cleaning of utensils and hands concurrently with soap where there is any infection, even colds, is the present advice from Uncle Sam for the protection of all.

The Salvage Shop.

The salvage shop at the Health Center is ready to receive all manner of clothing, especially for little children. The Center is open every day from 2 to 4. Anyone who has any things to donate to the salvage shop for it with her car.

Anyone in need of clothing can be supplied at the salvage shop by the ladies who keep the Health Center open. If we do not have what you need we will try to get it. Charges on articles will be any amount from a penny up, according to circumstances, and when someone hasn't even a penny, he may work to pay for the article by means asked by the Health Center worker, such as carrying in wood, filling the water can, cleaning the Health Center, etc.

Surely no child need be out of school now for want of clothes. Bring us anything you don't need. Come and get what you do need. Learn to make things over to make something out of nothing. That is valuable ability.

THE 3 AMENDMENTS TO BE SUBMITTED TO MICH. VOTERS

PEOPLE MUST DECIDE ON PAROCHIAL SCHOOL AMENDMENT, STATE RE-APPORTIONMENT AND STATE INCOME TAX.

At the General Election to be held in this state on Tuesday, November 4th, 1924, there will be submitted to the electors three proposed amendments to the Constitution of the state as follows:

A proposed amendment to Article XI of the Constitution relative to compulsory attendance at a public school of all children between the ages of seven and sixteen years until they have graduated from the eighth grade, and to read as follows:

"SECTION 16. From and after August 1st, 1925, all children residing in the State of Michigan, between the ages of seven years and sixteen years, shall attend a public school until they have graduated from the eighth grade."

"SECTION 17. The legislature shall enact all necessary legislation to render said section 16 effective."

The effect of this proposed amendment, if adopted, will be to make it compulsory for all children in the state between the ages of seven and sixteen years to attend a public school until they have graduated from the eighth grade.

A proposed amendment to Article X of the Constitution authorizing the enactment of a graduated income tax, and to read as follows:

"SECTION 3. The legislature shall provide by law a uniform rule of taxation, except on property paying specific taxes, and taxes shall be levied on such property as shall be prescribed by law. The legislature shall provide by law a scheme of taxes upon the net gains, profits and incomes of all citizens and inhabitants of this state, from whatever source said gains, profits and incomes are derived, which tax shall be graduated and progressive as follows:

"There shall be an exemption of \$4,000 per annum of all incomes.

"Incomes from \$4,000 to \$20,000 per annum shall be taxed at the rate of 5 per centum.

"All incomes above \$20,000 up to and including \$40,000, shall be taxed at the rate of 6 per centum.

"All incomes above \$40,000 up to and including \$60,000 shall be taxed at the rate of 7 per centum.

"All incomes above \$60,000 up to and including \$80,000 shall be taxed at the rate of 8 per centum.

"All incomes above \$80,000 up to and including \$100,000, shall be taxed at the rate of 9 per centum.

"All incomes above \$100,000 shall be taxed at the rate of 10 per centum.

"The income tax law, herein authorized shall be administered by a board of state tax commissioners.

"All monies paid to a board of state tax commissioners under the provisions of this amendment shall be paid into the state treasury and shall then be credited to the general fund of the state, and shall be used for defraying the general expenses of the state government and for the payment of principal and interest on state bonds.

"On or before the first day of September of each year, the auditor general shall deduct from the total amount directed by the legislature to be included in the state tax for that year, the amount of money received under the provisions of this amendment and credited to the general fund of the state for the current year, and the balance, if any, shall be deemed to constitute the state tax to be apportioned among the various counties of the state in accordance with the provisions of the general tax law."

The effect of this proposed amendment, if adopted, will be to authorize the enactment of a graduated income tax law.

A proposed amendment to Article V of the Constitution dividing the state into senatorial and representative districts, and to read as follows:

"SECTION 2. The Senate shall consist of thirty-two members elected for two years and by single districts. Such districts shall be numbered from one to thirty-two inclusive, each of which shall choose one senator. The House of Representatives shall consist of one hundred members elected for two years and by single districts. Such districts shall be numbered from one to one hundred inclusive, each of which shall choose one representative."

"SECTION 3. The Secretary of State, the Attorney General and the Lieutenant Governor, acting as a board of review, shall on or before the first day of April, 1925, and every eighth year thereafter, divide the territory of the state into thirty-two senatorial districts. Such districts shall consist of convenient and contiguous territory with regular boundaries following the county, city or township lines as nearly as possible and shall contain, as nearly as may be, an equal number of registered and qualified voters. The Secretary of State, the Attorney General and the Lieutenant Governor, acting as a board of review, shall on or before the first day of April, 1925, and every eighth year thereafter, divide the territory of the state into one hundred representative districts. Such districts shall consist of convenient and contiguous territory with regular boundaries following the county, city or township lines as nearly as possible and shall contain, as nearly as may be, an equal number of registered and qualified voters. Provided, that in the formation of such districts no township shall be divided thereby."

"SECTION 4. On or before the first day of January, 1925, and every eighth year thereafter, the clerks of the several counties, cities and townships shall cause to be filed with the secretary of state a certified statement of the number of registered and qualified voters residing therein at the last presidential election."

The effect of this proposed amendment, if adopted, will be to authorize a division of the state into senatorial and representative districts by a Board of Review consisting of the Secretary of State, the Attorney General, and the Lieutenant Governor.

JOHN QUINCY ROBERTS.

John Quincy Roberts passed suddenly away at his home in Maple Forest Township Tuesday morning of last week having taken ill the evening before. The funeral was held Friday afternoon with services at the home at 2:00 o'clock. Rev. Fred E. Hart conducted same. Interment was in Maple Forest cemetery. The funeral was largely attended.

John Quincy Roberts was born at Novi, Jackson County, Michigan, Nov. 16, 1860, and when he was thirteen years old he moved with his parents to Ionia, Mich., where his father was engaged in farming. It was in this city on June 2nd, 1880 that he was united in marriage to Miss Anna Baxter, and the couple resided on a farm there until 1900 when they moved to Maple Rapids, Gratiot county residing there until 1912, when they came to Crawford county and purchased their present farm in Maple Forest.

The deceased is survived by his wife and two nieces and four nephews, Mrs. Cynthia Francis, Mrs. Eva Meyers, Jay, Walter and Eugene Roberts of Ionia and Glenn Roberts of Detroit. Mr. Roberts had many friends in every community in which he lived, and his many friends in Maple Forest were grieved over his death. He was a man of sterling character, a good neighbor and a loving husband. His quiet pleasing manner won for him many warm friends.

Those from out of town who were in attendance at the funeral were Mr. and Mrs. Frank Francis, Mrs. Eva Meyers, Mr. and Mrs. Walter Roberts of Ionia, Mr. and Mrs. VanAlstine, Glen Roberts, Jack Tienhart, all of Detroit; Mr. and Mrs. John Kenney, Mr. and Mrs. Frank Kenney and Mr. and Mrs. Jas. VanValkenburg of Atlanta, Ga.; Mr. and Mrs. John Ritchie and Mrs. Phillip Bush of Gaylord.

This is to be given for the benefit of the Grayling school, and was secured thru the efforts of Miss LaSalle, teacher of music. Admission 25 and 50 cents.

G.—H.—S. "PEP"

Maude Taylor, Marion Reynolds and Helen Johnson, Editors.

Here we are already to take the place of the "Tattler" that so impartially made light of the doings of G. H. S. during the years 1923-24. They were amateurs—we are professionals!!

The G. H. S. Teachers.

Mr. B. E. Smith, superintendent. Miss Cecil Harris, principal. Miss Mary E. Sharpe, English. Miss Hazel Shankel, French and Latin.

Miss Eleanor Thomas, commercial. Miss Louise Hainline, mathematics. Miss Mabel Fox, science and history.

Miss Erma Turcott, physical training. Miss Ireta LaSalle, music and drawing.

Miss Ethel Sprague, domestic science and art.

Mr. J. K. Burnham, mathematics and physical training.

The Grade Teachers.

Miss Gladys Jury, 6th grade. Miss Dorothy Rydt, 5th and 6th grades.

Miss Marguerite Thayer, 5th and 6th grades.

Miss Louella Meyers, 4th grade. Miss Joy Fouch, 4th grade.

Miss Marian Salling, 3rd grade. Miss Mae Richardson, 2nd grade.

Miss Mildred Bates, 1st grade. Miss Ruth Gregory, kindergarten.

Miss Katherine Proud, 1st grade, South Side.

Mrs. Erma Gothro, 2nd and 3rd grades, South Side.

G. H. S. Organizations.

The various classes called meetings Friday to get organized. The classes and their officers are as follows:

Senior Class.

Miss Cecil Harris, advisor. Edgar Douglas, president. Astrid Ahman, secretary. Sigurd Johnson, treasurer.

Junior Class.

Miss Mabel Fox, advisor. Russell Robertson, president. Matt Stareinich, vice president. Matt Bidvia, secretary.

Sophomore Class.

Miss Mary Sharpe, advisor. Shirley McNeven, president. Candice Feldhausen, vice president. Helen Schumann, secretary. Sigurd Johnson, treasurer.

Freshman Class.

Miss Turcott, advisor. Beatrice Trudo, president. George Schroeder, vice president. Florence Lindahl, secretary. Janice Bailey, treasurer.

The Glee Club.

The Glee Club. Girls have organized. The officers are: Bernice Corwin, president. Marian Reynolds, vice president. Shirley McNeven, secretary. Helen Johnson, treasurer.

This class is under the instruction of Miss LaSalle, and we hope to produce one of the best organizations this school has ever put on.

The Debating Club.

Miss Fox has already organized a Debating Club which meets every Monday and Friday nights.

The subject this year is the study of the "Independence of the Philippines." This is a very interesting subject and there are many good arguments both Pro and Con.

If you are interested in debating please enroll at once and get your place on the team. Those reporting are:

Clarence Morfit. Edgar Douglas. Matt Stareinich. Donald Reynolds.

Several of the seniors of the class of '24 came to visit the school before leaving for college.

About 217 absent marks in High school this month. (Too many fairs.)

The Senior class of this year had their pictures taken. There were also pictures taken of the whole school.

The Tennis court is now open, and very interesting games are being played.

Watch for the coming date October 17.

Mr. Smith went to Petoskey Saturday to referee a game of football between East Jordan and Petoskey high schools. (Must have been a rough game, because he has been ill since his return.)

The Senior girls will be ordered in a short time—Get your order in now!!

Jokes.

Don't come to school all dressed up, it's not a place of recreation—it's a factory to work in.

Agnes Hanson: "Have you heard 'Charlie My Boy'?"

Edgar Douglas: "What does he play?"

Found on a test paper of a bright student in the Chemistry class, N.A. (sodium) plus H2O (water) yields rust.

How about it Shiek?

Little Virginia Hoessl was coming up the stairs crying when she met her brother Ernest, and the following conversation took place:

Ernie: What's the matter Virginia?

Virginia: Someone hit me on the head with a stone.

Ernie: Who was it?

V: Oh I don't know, some big boy.

E: How big was it?

V: You mean the stone?

E: Yes.

V: Well it was about as large as your head but not quite as thick.

Miss Harris: What do you expect to be when you get out of school?

"Augie" Meyers: An old man.

Say when you come around by the river drop in.

Mr. Smith: Where were you yesterday Astrid?

Astrid Ahman: Why, I went out to the lake.

Mr. Smith: That's funny I've heard

WOMANS CLUBS HIT LAW VIOLATION

The Avalanche is pleased to publish the following report this has been contributed by one of the Grayling delegates in attendance at the annual meeting of the State Federation of Women's Clubs, held in Petoskey Sept. 23rd to 26th. It reads as follows:

Voters, take notice.

Especially candidates for office.

The following items voice the opinions of 200,000 women voters of our state:

"A man who violates the law is neither a Republican nor a Democrat but a criminal."

"If the boys and girls of the present day are taught and trained to observe the law, there will be less need for law enforcement, a generation hence."

"Let everyone remember that he who violates the law of the land tramples on the blood of the fathers, and tears asunder the character of his own and his children's liberty."—A. Lincoln.

"The man who patronizes the bootlegger is a grade lower in the moral scale than the bootlegger himself. The bootlegger sins for money; his patron puts his love for liquor above respect for law."—W. J. Bryan.

"You laugh at prohibition laws; the lawless laugh at the property laws. Watch out that your son does not laugh at all laws! Let's quit laughing at any law."

"All government in Republics rests upon obedience to law. Disregard for law tears down the very basis of free government. It is most gratifying that most citizens, whether they approve of prohibition or not are observing the prohibition law. Disregard for law is the foundation of anarchy."

FORMER GRAYLING BOY MEETS TRAGIC DEATH.

Body Recovered From Detroit River—Week After Accident.

Bernard Sorenson, of Ecorse, Detroit, a former Grayling boy and the third oldest son of Mr. and Mrs. Victor Sorenson of this city lost his life by drowning in the Detroit River on the morning of September 22nd. The body was not recovered until last Sunday afternoon at two o'clock.

After the river had been dynamited and a crew of 100 men engaged to try and locate the body, which was found near the Detroit river flows into Lake Erie and near the Canadian shore. A boat with a pal, Oscar Reah, age 19, also of Ecorse, in a small motor boat attempted to cross the Detroit River, when they were overtaken by a terrific windstorm and they were tossed about on the waves until their small boat capsized. A dense fog had massed on the river, and this obstructed their view, so they did not know which way to go and the boat did not last long in the strong gale. Reah's body was

of people getting Spring fever, but this is the first time I have ever heard of them getting it in the fall.

Balinda: Say, Stan I was just talking to you.

Stan: Did you do the talking?

Balinda: Why yes.

Stan: Then it wasn't my girl.

The H. S. property contributes:

The noon-day taxi—York Edmond's Ford.

The brightest spot on the campus—Donald Reynolds (You know I mean his hair).

The Tennis court—a good excuse. Some of our ten o'clock scholars:

1. John Brady.

2. Devere Schmidt.

3. Willard Johnson, (mostly not at all).

4. "Augie" Meyers.

5. Ora Ingalls.

The Hits of G. H. S.

"Charlie My Boy"—Charles Isenbauer.

"Jealous"—Helen Johnson.

"When Lights are Low"—Balinda and "Pete".

"My Love Came Back"—Astrid LaGrow.

"Oogie O Gosh, O Gosh, I'm in love"—Lillian Ziebell.

"The Shiek"—James Hoessl.

"My Sweetie Went Away"—Astrid Ahman.

"Whispering"—Edgar Douglas and Howard Herick.

"Foolish Child"—Maxine Collen.

"Just the Girl that Men Forget"—Agnes Hanson.

Miss Sharpe: Willard give me three proofs that the world is round.

Willard: You say so, Pa says so, and Ma says so.

There was a time when flappers got tanned without going to the seashore, but parents are more lenient now.

"Willard!"

"Yes Pop."

"Can you carry a tune?"

"Certainly, I can carry a tune, Pop."

"Well, carry the one you're whistling out in the back yard and bury it."

Miss Fox: In what battle did Gen. Wolfe, when hearing of victory, cry "I die happy?"

Genevieve Montour: I think it was his last battle.

Waste of words.

Edgar: Now, Lucilla, suppose you had two apples, and you gave Marian her choice of one, you would tell her to take the bigger one, wouldn't you?

Balinda: No, Sir.

Edgar: Why?

Balinda: Cos, wouldn't be necessary.

Sports and Athletics.

The football team returned home from Boyne City with a defeat. This was the first game the foot ball eleven had played this season. We wish them better luck next time.

recovered 5 days later and Bernard's body when recovered Sunday was so badly decomposed that it was almost impossible to identify him, but was finally identified by his wife by a couple of scars on his right hand.

The remains arrived in Grayling Monday afternoon for burial, accompanied by his wife and children, her sister Mrs. Zoia Deuall and the deceased's father, Mr. Sorenson, who was called to Detroit, at the time of his son's drowning. The funeral was held that afternoon at 2:00 o'clock at Ebenezer hall, Rev. A. Herman Baughn conducting the service. Interment was in Elmwood cemetery.

Besides his wife and children, Bernard Jr., Claude, Laurene and Betty Jane; his parents heretofore mentioned the deceased is survived by seven sisters and brothers, Mrs. Charles Roddick, Mrs. Charles Beck, Ferdinand and Herman of Detroit, and Conrad, Harry and Miss Nina of this city.

Bernard was 31 years old and was born in Grayling. His parents, wife and children have the sympathy of their friends in their sorrow.

OVER AVATANCHE OFFICE

Michigan Happenings

Arraigned before Justice Charles Hoyt, at Monroe, and charged with having made an assault upon Henry Hobart, Lambertville farmer, with intent to commit murder and also charged with having terrorized the vicinity of Lambertville, Edward Stepanek, 21 years old; Stanley Ambroski, 23; Joe Byers, 23; Howard Kessler, 27; Conrad Blalock, 17; all of Toledo, Mich., pleaded not guilty. Examination was set for this week. Each was asked to furnish \$7,500 bail.

On the ground, that a man going home from work isn't working, the city of Battle Creek has decided to appeal to the supreme court in the dam age suit of Mrs. Rena Keagle, whom the department of labor and industry awarded \$4,200 plus funeral expenses. Henry Keagle was killed in May, 1928, when his team, which has been in city service, hauling dirt, ran away throwing him to the pavement head-first. He had finished his day and was taking the horses to the barn.

The chemical engineering department at the University of Michigan has disposed of its patents on a salt evaporation machine for \$55,000, according to announcement by university officials. Experiments on the machine have been conducted under the supervision of Prof. W. L. Badger, and several students during the last two years. The machine marks the first attempt to attack the salt evaporation problem from an engineering standpoint.

A Grand Rapids artist, Gilbert White, is to be represented in the French national museum at Luxembourg palace. His landscape, "Les Andelys at Sunset," for which the French government is reported to have paid \$25,000, will be placed in the gallery alongside the work of other distinguished American artists.

Muskegon will spend \$1,141,872.93 in the operation of its government next year, exclusive of \$20,187.30 representing the school budget. Of this, \$788,944.56 will be raised by taxation, \$352,583.42 is being raised by other receipts. The state tax rate will be \$2.55 compared with \$2.58 last year.

Lapeere county's share of the state tax to be paid in December is \$188,800.10 according to the announcement of Emory B. Root, county clerk. The amount is \$40,161 less than the total paid last year. The University of Michigan and the soldiers sinking fund receive the greater portion of the money.

Phillip B. Hancock, 31 years old of New York City, is dead as the result of a wreck near Stony Creek, six miles south of Ypsilanti, in which a Toledo Ann Arbor bus was struck and overturned by an automobile driven by Otto Hygelund, a farmer, living near the scene of the accident.

Hillsdale County Boys' and Girls' clubs won \$236 in prize money at the western Michigan fair held at Grand Rapids. Forty first prize ribbons, forty-one second prize and twenty-three third were brought back to Hillsdale by the agriculturalists.

Arthur Adams, 50 years old of Jackson, engineer, was killed when Michigan Central train No. 1, west-bound from Detroit, struck a truck stalled on the track on the eastern outskirts of Kalamazoo and was wrecked.

After he had been attacked by a bull and suffered a dislocated and broken ankle, two broken ribs and severe cuts and bruises, Avery Stahl, living on a farm near Grand Ledge, climbed a tree and probably escaped death.

William Beebe, 65 years old, a fireman at a Bay City sawmill, was instantly killed when his clothing became caught in the drive shaft of the machinery, whirling him around and breaking his neck.

Fred Vanderscheer, a Moline merchant, was fatally injured near Wayland when his automobile crashed into a tree that had blown across the road during a recent storm.

Judge Edward J. Jeffries, of the Circuit Court, Detroit, in a recent decision, declared the Voorhees-Bahorski anti-gambling law constitutional.

Harold Wiesnemer, four years old, of Saginaw, was killed when he was struck by an automobile driven by Clarence Brewer, a farmer.

Dr. Marion L. Burton, president of the University of Michigan, will give the principal address at the dedication of the new Kalamazoo Central high school, October 16.

According to an opinion from the state department, the board of education of Monroe, may use the library fund, derived from fines paid by liquor law violators, for the maintenance of the public school library and the city institution, controlled by the board.

William Hall, Negro, alias "Wild Bill" Hall, of Kalamazoo, was convicted of stabbing to death Charles Raymond, caretaker of the Pine Crest sanitarium, by a jury in circuit court. Hall was sentenced by Judge Welmer to Marquette for life.

Setting fire to his clothes with matches, two-year-old Edward Wasmelwald, of Detroit, suffered burns which resulted in his death. His mother was shopping when the accident happened.

Ten to twenty years at hard labor in Marquette prison was the penalty imposed on Austin Down, 18, and Harry Loague, 19, both of Detroit, for attempting to hold up Fred Grey of LaPorte, Ind., and steal his automobile recently. Grey had given the youths a ride. When out in the country they slugged him with a heavy iron bolt, threw him from the car and fled in it, only to wreck it after a few miles driving. They were captured by bloodhounds. Down was wounded before he surrendered to the police.

The legality of the action of the St. Clair county board of election canvassers in throwing out the entire vote of the township of Grant on a technicality is to be tested by action of William B. Van Valkenburgh, who lost the Republican nomination for register of deeds to Gilbert H. Isbister, on a recount by 91 votes. The Grant ballots were initialed with an ordinary pencil, instead of with ink or an indelible pencil as provided by law. Van Valkenburgh lost 117 votes and Isbister 17 by this decision.

Frank Stevens and Tony Vadik, Ionia men, paid for their attempt to rob the Grand Trunk depot at Saranac. Stevens was sentenced to from 1-1/2 to 15 years as a Jackson, with a recommendation of 10 years. Vadik, who was paroled from the Michigan reformatory less than a month ago, with about seven years yet to serve, was returned to the reformatory to serve the remainder of his sentence.

Quarantine regulations for the townships of Biga, Blissfield and Raisin, have been ordered by the state department of agriculture, effective immediately. The action is the result of the discovery of European corn borer in the three townships. The regulation makes it unlawful to ship corn or broom corn into any township not under quarantine.

Suit for \$100,000 has been started in Saginaw circuit court by the Saginaw Chemical company, against the W. L. Fiescher & Co., of New York City, alleging damages resulting from loss of business through failure of a magnesium carbonate machine to function.

Two prominent Lapeere county farmers, George Gillet and Perry Baxter, are under arrest in connection with the death of Jason H. Potter, 23 years old, whose body was found in a deserted barn near Flint.

William W. Cook, a New York attorney is the alumnus who has donated the \$2,000,000 Lawyers' club building on the University of Michigan campus. It was revealed, which clears up a two-year mystery.

Charles Bowles, who was defeated by Joseph Martin for second place in the mayoralty race in Detroit, has announced that he will be a "watcher" candidate for that office at the November election.

Merle Voss, 23, shot when he left his father's farm house, five miles northwest of Luther, to investigate a noise near the granary. In a critical condition. Grain thieves are blamed for the shooting.

James Gans, 59 years old, and Dewey Bushaw, 34 years old, were electrocuted when they came into contact with a high tension wire in the wake of storm which swept Hart recently.

Four women called for jury service in the Muskegon Circuit court, will not be permitted to serve in the September panel because of lack of accommodations for mixed juries.

A terrific electrical storm accompanied by rain and gale recently visited Caro doing great damage to telephone and electric light wires in that part of the Thumb.

N. J. Holstega, 80 years old, a retired farmer of Blenden, was killed as he stepped in front of an automobile because he was unable to hear its warning signal.

Enrollment at the University of Michigan this year totals 8,400, slightly lower than the registration of last year, according to announcement from the registrars' office.

More than 1,200 dairymen from Michigan attended the National Dairy show at Milwaukee, Wis., according to Prof. O. E. Reed, of the dairy department of M. A. C.

Matthew Slattery 78 years old, of Grand Rapids, was killed and considerable property damage resulted from the recent severe electrical and wind storm.

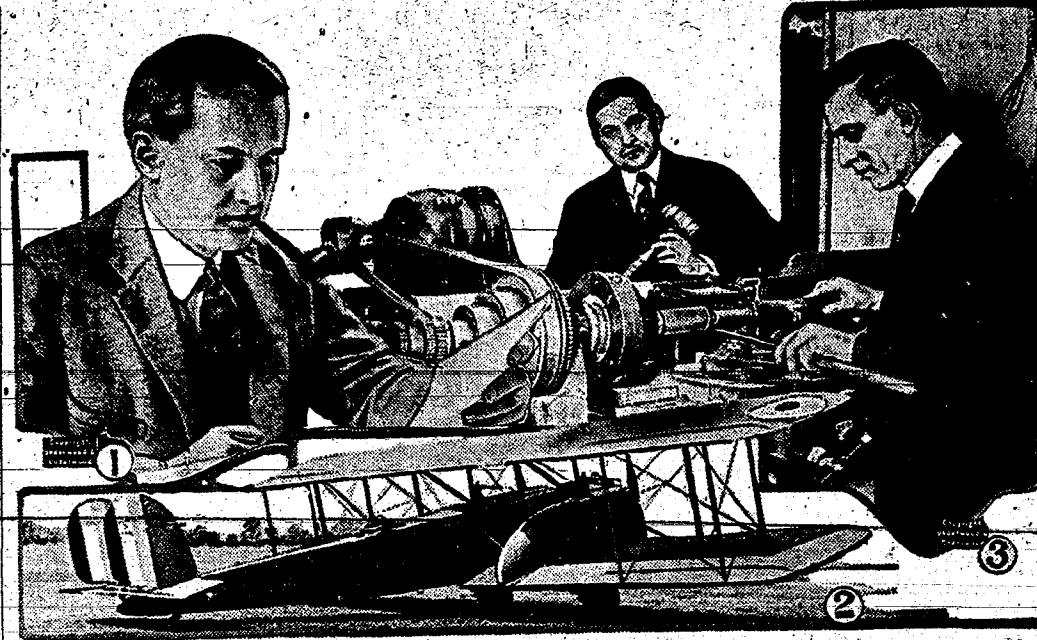

Mrs. Amy Boardman, 37 years old, of Bancroft, is dead as the result of injuries suffered in an automobile accident.

Mr. and Mrs. Walter Champion, of Grand Rapids, about 40 years old, were killed instantly when their automobile which stalled upon the tracks, was struck by an incoming Michigan Central passenger train said to be traveling at 55 miles an hour.

Included in the will of Pastor M. P. Phelan, aged resident of Iron River, who died recently, is a bequest to the St. Arnes church and congregation, of mining property fees and city lots valued at \$50,000.

A recent fire in No. 4 shaft of Calumet & Hecla Consolidated Copper Company, closed the mine down for eight days, affecting 1,750 men. It is believed that Martin Coppo, pumpman, who discovered the fire, gave the alarm, lost his life.

Dr. F. J. Knight, of Charlotte, was killed in a grade crossing accident. Dr. Knight was driving a sedan across a railroad track of the Michigan Central when a passenger train struck the car and killed him instantly.

1—Paul Shipman Andrews of Syracuse, N. Y., appointed by Attorney General Stone to take charge of war transactions bureau of Department of Justice. 2—New Elias bombing plane being tested for the government at Dayton, Ohio. 3—Employees of capital architect's office turning new gavel for the speaker of the house.

NEWS REVIEW OF CURRENT EVENTS

Congressman Hill to Obtain Ruling on Alcoholic Content of Home Brew.

By EDWARD W. PICKARD

WHETHER it is a violation of the prohibition law to make and possess home-made cider and fruit juices which contain an alcohol percentage of 2.75 is a question that interests thousands of farmers and other American citizens may soon be decided by a federal court. For a long time Congressman John Philip Hill of Maryland has been trying to get a court ruling on that point, and now he has been aided by a federal grand jury in Baltimore and will be tried on these counts:

1. Manufacture of 25 gallons of wine at his home on September 27, 1923.
2. Unlawful possession of wine on the same date.
3. Manufacture of 30 gallons of cider at his home on September 28, 1923.
4. Unlawful possession of cider on the same date.
5. Maintaining a common nuisance at his home by manufacturing wine.
6. Maintaining a common nuisance at his home by manufacturing cider.

Mr. Hill's home is already under temporary injunction because of his wine-making there last year as a means of forcing the courts to settle the point in the Volstead act which he wants defined.

Quite recently the congressman's friends gave him a cider press with which he made some 275 per cent elder which he served to several hundred guests. He invited Prohibition Commissioner Hynes to the press him, and the dry agents to arrest him. Mr. Hynes did not arrest him, giving the congressman the chance he wanted to determine whether 2.75 per cent drink is intoxicating. If Mr. Hill is found guilty he may be fined or sent to jail for as long as six months, but he is willing to take the chance.

For a few days Manila, known as the "Pearl City" under the American flag, was threatened with a dry regime, for the United States officials ruled that foreign ships destined for that port and carrying liquor should not be given bills of health by American consuls. But the Philippine customs officials have got around this by imposing only nominal fines on vessels arriving without bills of health, and normal conditions are restored in the bars of Manila.

THAT monumental liar and former German spy, Gustav B. Meius, has forced himself upon the front page again. He gave to Harry Daugherty a signed reproduction of his testimony before the senate investigating committee and declared that most of the other witnesses against the former attorney general also had perjured themselves at the procurement of the "prosecution." Daugherty immediately sent a copy of this confession to John W. Davis, who had been saying some very severe things about him and his conduct of justice under his command.

Matthew Slattery 78 years old, of Grand Rapids, was killed and considerable property damage resulted from the recent severe electrical and wind storm.

Mrs. Amy Boardman, 37 years old, of Bancroft, is dead as the result of injuries suffered in an automobile accident.

Mr. and Mrs. Walter Champion, of Grand Rapids, about 40 years old, were killed instantly when their automobile which stalled upon the tracks, was struck by an incoming Michigan Central passenger train said to be traveling at 55 miles an hour.

Included in the will of Pastor M. P. Phelan, aged resident of Iron River, who died recently, is a bequest to the St. Arnes church and congregation, of mining property fees and city lots valued at \$50,000.

A recent fire in No. 4 shaft of Calumet & Hecla Consolidated Copper Company, closed the mine down for eight days, affecting 1,750 men. It is believed that Martin Coppo, pumpman, who discovered the fire, gave the alarm, lost his life.

It is now revealed that the anti-soviet revolt in Georgia and Azerbaijan was provoked deliberately and promoted by the Bolshevik authorities in Moscow. The Russian government was afraid of a widespread revolution in the Caucasus, knowing it would have difficulty in suppressing it and that it would be supported by Turkey if time for its organization were allowed. The entire fleet might be needed in the disaffected region, and that would give opportunity to the enemies of the soviets both within and without Russia. Therefore it was determined that an abortive revolution in Georgia should be provoked after enough troops had been placed strategically and precautions taken to cut off communication with the outside. The check is executing suspects by the thousands and the soviets news that is permitted to leak out of Georgia indicates that the scheme of Moscow will be successful and the revolution smothered in blood.

NO REALLY serious fighting has

taken place yet between the forces of Marshal Chiang Tso-Lin and General Wu north of Peking, but those two commanders are gathering their armies for what promises to be a great battle that will decide the fate of the capital and of what China calls the corrupt clique that rules there. The Manchurian leader is well supplied with airplanes and bombs and with troops. He has bombed Wu's headquarters at Shanhaiwan and a troop train carrying him to the front. The Peking government, however, being removed from the front, has repulsed attacks by Chiang and advanced into Fengtien. On the Shanghai front both sides are preparing for a big offensive.

THE proposed protocol for securing arbitration, submitted to the League of Nations assembly is ratified by at least three of the four great powers—Great Britain, France, Italy and Japan—and ten smaller nations. It is proposed that a disarmament conference shall be called, to open on June 15 next in Geneva. The program will be prepared under the direction of the league council and the United States, Russia and Germany will be invited to participate. The arbitration and security protocol contains a clause providing that non-member states can accept it "so as to assure a specific solution of conflicts with signatories of the protocol."

Great Britain last week told Germany to join the league and the cabinet in Berlin decided to do so, but with provisions that indicate how much Germany has been cornered into. A note was sent to the league council setting forth German concessions to be made before Germany would apply for admission. The three most important are:

First, Germany must be given the status of a neutral. If the league engages in any armed undertaking against a covenant-breaking nation Germany cannot be conscripted nor her territory be crossed by league troops or troops of other powers acting under the league.

Second, Germany in throwing in her flag with the league does not recognize her war guilt, as admitted in the Versailles treaty.

Third, Germany must receive a permanent seat on the council as one of the great powers.

Germany also expressed a desire for evacuation of the Ruhr earlier than the date fixed in the London agreement, and wishes to be given mandates for her former colonies.

It is understood Germany cannot join the league during the present session of the assembly. If the league, after granting the conditions, laid down, calls a special session for Germany before the next regular meeting, Berlin could be persuaded to apply then.

Government circles in Berlin believe

that action is soon to be taken, the two cities are engaged in a hot controversy.

Jaffa, aided by its modern suburb, Tel-Aviv, a 100 per cent Jewish city, now a thriving town of 15,000, built on a site which 15 years ago was a sand dune, has gone ahead of Haifa in building activities.

Haifa, on the other hand, has led in industrial enterprise and points with pride to its most notable examples of industrial success, its flour mill and its oil factory.

This note will receive a favorable reply. Meanwhile the nationalists and junkies have let up in their attacks on the government in order to help along the floating of the loan provided for in the Dawes plan. Some of the American bankers now in Germany believe the United States will easily absorb \$100,000,000 of the loan. Others are not so optimistic.

Beginning October 1, an import tax of 20 per cent will be levied by France on all goods from Germany. This was authorized by parliament three years ago but not put in force.

CAPT. DONALD B. MACMILLAN has just returned to the United States after 15 months in the Arctic regions, and he brings the interesting though not surprising information that Doctor Cook did not get anywhere near the North pole. This he learned from one of the Eskimos who accompanied Cook in 1909.

The explorer in reaching Axel Heiberg land got within 500 miles of the pole. Doctor Macmillan said, and had he not tried to claim the glory of reaching the pole would have been greatly honored for what he had accomplished. Doctor Macmillan quoted the Eskimo as saying that if Doctor Cook went to the pole he must have gone there on his back.

Cook and his Eskimo companions were asleep. Cook and his Eskimo companions were asleep. Cook and his Eskimo companions were asleep.

ENDING their flight around the world, the army aviators have reached their official starting point in Seattle. They actually completed the circuit of the globe when they arrived at Rockwell field, San Diego, Cal. At Santa Monica the flyers landed upon a field covered with roses and each was given a purse of \$1,000 in gold.

CARPENTERS' union in Philadelphia was the scene last Thursday of 100 doings in celebration of the one hundred and thirtieth anniversary of the meeting there of the first Continental congress and the signing of the two hundredth birthday of the Carpenter's company. Among the invited guests were the governors of the 13 original states and the military organizations of those states which date back to the Declaration. In the evening President Coolidge delivered the chief address. Next day the celebrants all went to Valley Forge where a line pageant was arranged.

BRIG. GEN. CHARLES E. SAWYER, who was President Harding's personal physician and for a time in charge of hospitalization for the army, died suddenly of heart disease at his home in Marion, Ohio. At the time of his death he was chairman of the Harding Memorial association.

Two other noteworthy deaths of the week were those of Dr. J. Gamble, former United States senator from South Dakota, and W. R. Green, member of congress from Massachusetts. Mr. Green, one of the oldest congressmen in point of years and of service, died as a result of an accident.

GOV. AL SMITH of New York, having changed his mind about being a candidate for another term, was renominated by the Democratic convention without opposition.

Theodore Roosevelt, assistant secretary of the navy, for governor, despite a determined fight against him. They adopted a platform containing a plank denouncing the Ku-Klux-klan by name.

In California the LaFollette-Wheeler independent electors were hurried from the ballot by a decision of the state supreme court, the result being that the Wisconsin senator must use the Socialist electors there. In North Dakota the Republicans have asked the courts to keep the LaFollette electors, masquerading as Republicans, off the G. O. P. ticket, alleging that LaFollette is trying to steal the election through fraud, deceit and trickery. Summed up briefly according to the Republican viewpoint, the "Socialist Third party" electors seek election as Republicans, but have renounced their allegiance to Coolidge, are supporting LaFollette and will vote for him if they are successful.

Now that action is soon to be taken, the two cities are engaged in a hot controversy.

Jaffa, aided by its modern suburb, Tel-Aviv, a 100 per cent Jewish city, now a thriving town of 15,000, built on a site which 15 years ago was a sand dune, has gone ahead of Haifa in building activities.

MARKET REPORT

FURNISHED BY U. S. BUREAU OF MARKETS, WASHINGTON, D. C.

Grain market continues unsettled.

Wheat futures for week with continued reports of European crop and good export demand overhauling the visible supply of wheat and pressure spring wheat movement. Corn futures lower as heavy frosts delay corn down slightly across country. Corn with heavy movement new crop a depressing factor. Rye firm account export demand. State demand with corn account declining prices. Active demand other grains.

Quoted: No. 2 dark northern spring, Minneapolis \$1.34@1.61. No. 2 red winter wheat, Chicago \$1.38. No. 2 hard winter wheat, Chicago \$1.34-1.42. St. Louis \$1.32-1.42. Kansas City \$1.31-1.42. No. 2 hard winter wheat, Chicago \$1.34-1.42. St. Louis \$1.32-1.42. Kansas City \$1.31-1.42. No. 2 yellow corn, Chicago \$1.07-1.12. No. 2 white corn, Chicago \$1.07-1.12. No. 2 yellow corn, Chicago \$1.07-1.12. No. 2 white corn, Chicago \$1.07-1.12.

Butter markets somewhat steadier after a week of unsettled trading. Tone of market has been somewhat better, shortage of export goods about the only support. Production slowly decreasing as season advances. Butter demand have been quite heavy in relation to current demand. Some storage butter beginning to move although active movement being held back on account of current prices being below cost prices at time butter was stored. Firm foreign markets make some export trade appear as a possibility.

Closing wholesale prices on 32 score: New York \$1.14-1.40; Chicago \$1.14-1.40; Philadelphia \$1.14-1.40; Boston \$1.14-1.40.

Live Stock and Meats: Chicago hog prices ranged from firm to 15c higher than a week ago closing at \$13.50-14.00. For the top and bottom grades, butchers' and good hogs steady firm to 15c higher at \$13.50-14.00; butchers' and good hogs steady firm to 15c higher at \$13.50-14.00; butchers' and good hogs steady firm to 15c higher at \$13.50-14.00.

Potatoes 15c lower than a week ago. Cobblers from New Jersey brought \$1.35-1.40. For the top and bottom grades, butchers' and good hogs steady firm to 15c higher at \$13.50-14.00; butchers' and good hogs steady firm to 15c higher at \$13.50-14.00; butchers' and good hogs steady firm to 15c higher at \$13.50-14.00.

East Buffalo Live Cattle: Steady. Heavy, hoth and yearlings, \$10.00-11.00; pigs, \$9.75. Sheep: Steady. Top lambs, \$13.50; yearlings, \$10.00; weathers, \$10.00-11.00.

DETROIT QUOTATIONS: Live Cattle: Choice light yearlings (dry fed), \$13.50-14.00; best heavy (dry fed), \$13.50-14.00; best heavy (wet fed), \$13.50-14.00; best heavy (wet fed), \$13.50-14.00.

Grain and Feed: Wheat: No. 2 hard winter, \$1.34-1.42; No. 2 red winter, \$1.34-1.42; No. 2 yellow corn, \$1.07-1.12; No. 2 white corn, \$1.07-1.12.

Grain and Feed: Wheat: No. 2 hard winter, \$1.34-1.42; No. 2 red winter, \$1.34-1.42; No. 2 yellow corn, \$1.07-1.12; No. 2 white corn, \$1.07-1.12.

Grain and Feed: Wheat: No. 2 hard winter, \$1.34-1.42; No. 2 red winter, \$1.34-1.42; No. 2 yellow corn, \$1.07-1.12; No. 2 white corn, \$1.07-1.12.

Grain and Feed: Wheat: No. 2 hard winter, \$1.34-1.42; No. 2 red winter, \$1.34-1.42; No. 2 yellow corn, \$1.07-1.12; No. 2 white corn, \$1.07-1.12.

Grain and Feed: Wheat: No. 2 hard winter, \$1.34-1.42; No. 2 red winter, \$1.34-1.42; No. 2 yellow corn, \$1.07-1.12; No. 2 white corn, \$1.07-1.12.

Grain and Feed: Wheat: No. 2 hard winter, \$1.34-1.42; No. 2 red winter, \$1.34-1.42; No. 2 yellow corn, \$1.07-1.12; No. 2 white corn, \$1.07-1.12.

Grain and Feed: Wheat: No. 2 hard winter, \$1.34-1.42; No. 2 red winter, \$1.34-1.42; No. 2 yellow corn, \$1.07-1.12; No. 2 white corn, \$1.07-1.12.

Grain and Feed: Wheat: No. 2 hard winter, \$1.34-1.42; No. 2 red winter, \$1.34-1.42; No. 2 yellow corn, \$1.07-1.12; No. 2 white corn, \$1.07-1.12.

Grain and Feed: Wheat: No. 2 hard winter, \$1.34-1.42; No. 2 red winter, \$1.34-1.42; No. 2 yellow corn, \$1.07-1.12; No. 2 white corn, \$1.07-1.12.

Grain and Feed: Wheat: No. 2 hard winter, \$1.34-1.42; No. 2 red winter, \$1.34-1.42; No. 2 yellow corn, \$1.07-1.12; No. 2 white corn, \$1.07-1.12.

The AMERICAN LEGION

(Copy for The Department Supplied by the American Legion News Service.)

FLORIDA CHOOSES MORRIS COMMANDER

James Ward Morris, Jr., is the new commander of the Florida department of the American Legion—Florida is regarded as one of the outstanding departments in the Legion, as a result of its membership activities and of its program of civic endeavor. To Florida went the honor of leading the Legion in the parade at the recent national convention in St. Paul. This honor is awarded to the department attaining the highest percentage of its membership in the parade of the preceding year. Entering the first officers' training camp at Fort McPherson, Ga., on May 15, 1917, Mr. Morris was a first lieutenant's commission. He was with the American Legion in the Twenty-sixth Infantry of the Twenty-second division at Camp Gordon, Ga., from the organization of the division. He went overseas with that unit in April, 1918. Promoted to captain, he was assigned his regimental adjutant of the Three Hundred and Twenty-sixth Infantry. He was in the Tenth and March sectors. He took part in the St. Mihiel and Meuse-Argonne offensives. He was captain of his company and then operations officer of his regiment until its demobilization. After his discharge, he received a certificate of citation from General Pershing for meritorious service.

After training at Stanton Military academy and Fortner Military school, Mr. Morris graduated from the University of North Carolina in 1912. He completed his law course in 1913 and began the practice at Tampa in June of that year. He was born in Smithfield, N. C., on November 14, 1890.

Col. Cephas C. Bateman Becomes Legion Member

The San Diego (Cal.) post of the American Legion is proud of the distinction that has recently come to it in the enrollment as a member of Col. Cephas C. Bateman, chaplain, U. S. A., retired, and the oldest member in point of unbroken service as chaplain in the United States army.

Colonel Bateman was born in Michigan in 1876, came to the Pacific coast in 1891 and was educated and ordained as a clergyman in California. He was appointed chaplain in the regular army by President Benjamin Harrison in 1890 with the rank of captain, and was made a delegate to the World's Congress of Religions at the Columbian exposition in 1893. He served with Shafter at Santiago in 1898. He also served twice in the Philippines, more than a year with troops in expeditions directed against the Moros. At the outbreak of the World War, Chaplain Bateman was active in the United States army and was later organizer and first director of the chaplain's school of the army now situated at Fort Leavenworth, retiring in 1921 on account of age.

After a lifetime of travel in service to his God, country and flag, Colonel Bateman has selected San Diego as his home and the American Legion is proud of him and his splendid record. A loyal, active Legionnaire, Colonel Bateman has taken a keen interest in the work of the local legion and will be addressed by two men prominent in the affairs of the nation, one of whom will be Judge Keneaw Mountain Landis. The second speaker has not been named.

Emergency Rations: "Where's my whisk broom, Mary?" asked the professor. "You ate it for breakfast, sir," replied the maid. "The other cereal was all gone."—American Legion Weekly.

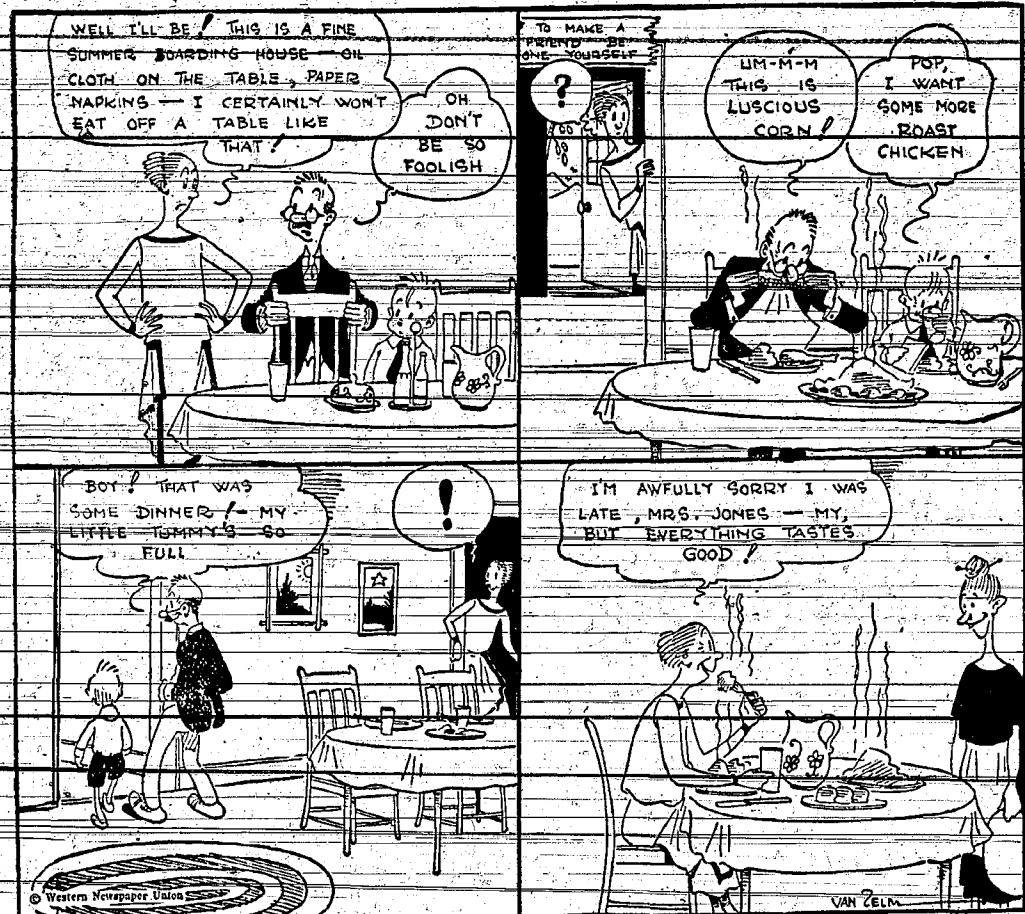

When Justice Winks: "East! Eastward—Oh, I love the West! It's a free and untrammeled Western—Yes, the sheriff is a pretty good scout."—American Legion Weekly.

BRUSHED WOOL IS IN STYLE; FALL BLOUSES ARE NOW HERE

WHEN it comes to ultra style, much of the new fall knitted outerwear seems to "say it" with brushed wool. Not that brushed wool in itself is an unknown quantity, but it is because of its fascinating knitted interpretations, that we are experiencing new thrills this season. Designers have succeeded in lifting the brushed wool theme out of the commonplace, until today it is the outstanding expression of knitted style distinction.

Part of the scheme of displaying brushed wool at its handsomest is to contrast it with something else. For

OF KNITTED BRUSHED WOOL

instance, in case of the effective sweater here pictured, the brushed wool assumes a greater shaggy and attractiveness because of its wide trimmings of blue silk at collar, cuffs and sleeves. This mode of finishing is a decorative feature emphasized throughout the brushed wool collections this season. Note, also, the new Russian neckline.

It is a foregone conclusion that the schoolgirl's wardrobe will include a brushed wool sweater in some one or other of the newest juvenile models. Especially popular is the mid-length brushed wool, and long sleeves must

When new blouses for fall began to arrive they brought in their company the tunic-blouse. There is never any question as to the welcome that awaits blouses each season; the overblouse has made a comprehensive success, paving the way for its next of kin, the tunic-blouse, which has already established itself among the new modes for fall and winter.

Overblouses are developed in tailored, sports and formal styles, but the tunic-blouse, so far, confines itself to the dresser types and seems likely to give little attention to any others.

TWO FALL BLOUSES

It has to be up-to-the-moment in modishness.

These favored middles are knitted in shaggy white with plain-knit fiber sweater trimmings, in buff with blue and the most recent cool weather arrivals stress rusty browns, cocoa and beige.

If a brushed wool sweater with fiber silk or rayon sweater reversing the order, by using the brushed wool for its trimming. Brushed wool bandings, collars, cuffs and belts on plain smooth-knit silken garments is one of the ways designers have in setting forth a new fashion. Sometimes straightline-knit frocks are elaborated with borders of shaggy knit wool. The fact that such novel effects as brushed wool, also: clipped or sheared wool, have come into play this season adds a refreshing note to the styling of present-day knitted outerwear.

In the fall showings hi-length jackets of brushed wool striped in colorful patterns are featured; also fanciful scarfs of brushed wool.

black lace are finished with bindings of black satin.

Tunic-blouses and overblouses reveal variety in necklines, with the "v" shaped neck opening, high at the back, a favorite. Convertible collars, which may be worn up about the throat or open at the front, scarf attachments and several styles in high collars are points of interest in autumn blouses.

Crepe de chine continues to rank first among fabrics for making the overblouse, but cotton crepe, knitted bengaline, georgette, lace and metal brocades are all represented—the last three for blouses to be worn with the costume suit. Simple models for afternoon are shown in long and short sleeved designs and are very often trimmed with emplacements of flatter lace or narrow val-lace edgings—or both. Val lace trills and a lattice decoration of narrow ribbon give a good account of themselves as a finish for the simple and pretty blouse pictured here.

Daddy's Evening Fairy Tale

BY MARY GRAHAM BONNER

UNINVITED WIND

"I have a funny engagement," said Mr. Wind.

The Breeze Brothers looked at Mr. Wind and said:

"You seem to be getting dressed up in your best."

"Yes," said Mr. Wind, "I have put on my best windy cape, and my best windy hat and my best fly-away windy shoes. But I have really nothing which makes me keep this engagement of mine."

"I mean that I have had no invitation to go where I am going. But I am going just the same."

"You see some creatures are so silly. They don't blow in on others for supper, for example. They wait until they're asked."

"Sometimes they will hint for an invitation. But most of the time they will not even do that."

"They wait until they are asked, and if they're not asked they just don't go at all."

"But I am different."

"I feel like going on a party and I feel like seeing some people and so I am going."

"I haven't hinted about it. No, I have not done that. Nor have I been invited, as I've said."

"But I feel as though I would like to have some fun blowing through window cracks, and if windows are open I shall blow right in and I shall not have my best manners with me."

"No, I'm going to leave my best manners at home."

"You know I often do that. I say to myself:

"Now, Wind, go out and have a good time and don't bother about manners."

"And then I answer myself in this fashion:

"All right, Wind, I'll do as you suggest."

"So I just leave my manners at home wrapped up for safekeeping in case I may want them at some time."

"That is one of the advantages about not being asked to a party."

"If I had been invited to visit the people I might have felt it my duty to have unpicked my best manners before I started."

"I might have felt that I would have had to say how kind it was of them to

He Waved a Windy Farewell.

have invited me, and I might have felt that I would have to say that it was such a pleasure."

"It is a pleasure to go, but I don't have to say so. Nor do I have to say it was kind of them to have invited me."

"And when I want to leave I don't have to shake hands with my host and hostess and tell them what a good time I had. No, I don't have to take a single manner along with me."

"We didn't know that manners ever came singly," said the Breeze Brothers.

"You don't know everything," said Mr. Wind, with a little windy smile.

"Ah, yes, I have lots of manners. If I want to use a lot and if I only want one or two I may only use one or two."

"People are the same way. They may go out and not say a polite thing and then just before leaving they may make one polite speech."

"That was just one manner they took along with them."

"Or that is the way I speak of manners at any rate, and I don't see why I'm not quite right in speaking as I do."

"I'm a powerful fellow in my way and I'm sure what I say is right, to my own windy way of thinking—at any rate."

"But I can't talk to you any more. I must be off. I am planning to call on lots of people."

"I shall blow right in between the cracks, as I've said, and I'll stir up a lot of air."

"People will say that I have come uninvited and that I have been able to get in all sorts of places."

"They will speak of putting window strips upon their windows to keep me out."

"But I won't mind. For Mr. Wind has a way of getting in when he wants to get in, and anyway, I will have had my fun this time."

"So, Breeze Brothers, I must be off."

He waved a windy farewell to the Breeze Brothers and they waved to him.

And off went Mr. Wind, quite uninvited, but expecting to have a very jolly time just the same!

No Wonder

Teacher: "Why, Willie! Such dirty hands! What brought you up?" Willie: "De coal man, in his wagon, me'am." Judge.

One Dead Shot

Tommy: Please, mister, give me another box of those pills which I got for my mother yesterday.

Druggist: I sure will, but did your mother say she liked them?

FIRST FLOATING FAIR SENT OUT BY GERMANY

Pilgrimage to Ports of Europe, Asia and Africa.

Hamburg, Germany.—The first German floating fair will leave Hamburg July 30 on a voyage which will occupy six months and take the fairship, "Europa," to all the ports of Europe, Asia and Africa.

The ship is to give something to every port it visits, and is to carry the "Made in Germany" label to distant parts of Europe, Asia and Africa. If the experiment proves successful, a second ship is to be sent out on a trip to North and South America.

There will be room for the exhibitors on this floating fair ground, and in addition to a painting shop, bookshop, photographic studio, post and telegraph, film and magic lantern shows, and a band orchestra. The fair service is to show German places of interest, especially industrial areas and industrial processes.

It is planned that the floating fair shall stop from three to eight days in every harbor visited. The fair is to be a floating fair ground, and is to be a floating fair ground.

The fair is to be a floating fair ground, and is to be a floating fair ground.

G. S. DROPS FIRST FOOT BALL GAME TO BOYNE CITY.

By Donald Brennan.

Grayling high school lost their first game of the season at Boyne City last Saturday by the large margin of 15 to 2. However it was not a surprise for we have only two men from last year, and being inexperienced, and never had played in a game before.

Boyne City made their points on end runs and goal kicks, running the score up to 15, holding Grayling to one safety which accounted for their two points.

Quarterback "Buck" Smith tried the plunges time and time again, but to no advantage, being easily stopped by the odds of experience.

Grayling had a full back, and for the past ten years, and at the present are carrying 15 men and that they were able to substitute at all times of the game. G. S. men learned more from this game than if they had won because it showed them what they should have done and at what they will prepare for Boyne City when they play here.

The Grayling lineup: Right end—C. Smith; Right tackle—C. Smith; Right guard—C. Smith; Left guard—C. Smith; Left tackle—C. Smith; Left end—C. Smith; Quarterback—Buck Smith; Running back—C. Smith; Full back—C. Smith; Linebacker—C. Smith; Tackle—C. Smith; Guard—C. Smith; End—C. Smith.

The Grayling lineup: Right end—C. Smith; Right tackle—C. Smith; Right guard—C. Smith; Left guard—C. Smith; Left tackle—C. Smith; Left end—C. Smith; Quarterback—Buck Smith; Running back—C. Smith; Full back—C. Smith; Linebacker—C. Smith; Tackle—C. Smith; Guard—C. Smith; End—C. Smith.

The Grayling lineup: Right end—C. Smith; Right tackle—C. Smith; Right guard—C. Smith; Left guard—C. Smith; Left tackle—C. Smith; Left end—C. Smith; Quarterback—Buck Smith; Running back—C. Smith; Full back—C. Smith; Linebacker—C. Smith; Tackle—C. Smith; Guard—C. Smith; End—C. Smith.

The Grayling lineup: Right end—C. Smith; Right tackle—C. Smith; Right guard—C. Smith; Left guard—C. Smith; Left tackle—C. Smith; Left end—C. Smith; Quarterback—Buck Smith; Running back—C. Smith; Full back—C. Smith; Linebacker—C. Smith; Tackle—C. Smith; Guard—C. Smith; End—C. Smith.

The Grayling lineup: Right end—C. Smith; Right tackle—C. Smith; Right guard—C. Smith; Left guard—C. Smith; Left tackle—C. Smith; Left end—C. Smith; Quarterback—Buck Smith; Running back—C. Smith; Full back—C. Smith; Linebacker—C. Smith; Tackle—C. Smith; Guard—C. Smith; End—C. Smith.

MINOR MUSINGS.

The Arabs know their stuff. They have a motto which reads, "Never argue with a woman, a child or a camel."

A seasoned wife knows she needn't worry much about her health until he comes to care what he has for dinner.

A very poor man tries to think that all the rich are unhappy.

The man who always agrees with you generally wants something out of you.

For some reason the man who cuts a big figure in society hardly ever cuts a big figure on the salary sheet.

Almost anybody can get some kind of a car, but that's not the kind of car the family wants.

The only man who professes to understand women are those who can't understand themselves.

The thing that women resent about a husband is that he seems to be having so much fun.

Women who wouldn't think of consulting a nurse unless they were ill, don't hesitate to permit ignorant or careless nurses to rear their children.

The thing that women resent about a husband is that he seems to be having so much fun.

Guard Your Health! It's Your Best Asset

Milwaukee, Wis.—"For the last twenty years I have used Dr. Pierce's Golden Medical Discovery at times, as a general tonic, with excellent results. One bottle, in the spring, and one in the fall, is usually sufficient. It gives me added strength and endurance, and greatly aids me in following my strenuous occupation."—John W. McLain, 188 Wisconsin St., Buffalo, N. Y., for trial pkg. Write for free advice.

Famous Character in Popular Books

"Oliver Twist," as at first born in the brain of Dickens, was a different creation from the Oliver we know. It was a visit by Dickens to Cruikshank's studio that changed the life story of the workhouse boy. There the author saw a series of sketches illustrating the career of a London thief. There was a sketch of a Fagin's den. There was the Artful Dodger. Oliver, Bates and Bill Sikes. All these Dickens worked into the book which the world knows so well.

Sir Rider Haggard won greater fame by his strange creation, the never-dying queen, "She," than by anything else he wrote. "She" is the legend of the Queen Majah, well known to the natives of the hills around Zoutpansberg, which Sir Rider was one of the first Britishers to hear. Majah has really been dead for many years, but the natives believe she still lives, hidden in some mysterious cavern of the mountains of the Transvaal.

Important to All Women Readers of This Paper

Swamp-Root—A Fine Medicine

Thousands upon thousands of women have kidney or bladder trouble and never know it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease. If the kidneys are not in a healthy condition they may cause the other organs to become diseased.

You may suffer pain in the back, head, or joints, or feel nervous, irritable and may be dependent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root does to the kidney, liver and bladder medicine will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by parcel post. You can purchase medium and large size bottles at all drug stores.—Advertisement.

Changes in Sun's Spots

By means of photographs of the sun, Prof. G. H. Peters, of the United States observatory, showed members of the American astronomical society in session at Hanover, N. H., how the number of spots on the sun had decreased and increased during a period of many months. Few spots in August, 1923, after several months of decrease in numbers and followed by a sharp increase in September were taken to indicate the ending of a cycle of 11 years of solar activity and the beginning of a new period of similar length.

Don't Forget Cuticura-Talcum—When adding to your toilet requisites. An exquisite face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum), 25c each everywhere.—Advertisement.

Better Than Lawyers

"Where's your lawyer?" demanded Judge Collins recently of a colored man who was up before him for trial. When the colored man replied that he did not have a lawyer the judge assigned one of the assistant prosecutors to defend him. The man looked over the bar and leaned over the bar and whispered in a voice that could be heard throughout the courtroom. "Judge, you would give me a couple of good witnesses. I think they would do me more good than the lawyer."—Indianapolis News.

DRIVER LOSES WHEEL, BUT KEEPS HIS HEAD

Raymond Mays, a member of the South Wales Automobile club, driving a car at 60 miles an hour, lost his rear wheel when his axle snapped. Due to his expert driving the machine was kept from turning over and Mays was uninjured. Note the wheel in the air after leaving the broken axle and the driver about to pull up on his emergency brake.

IS IT CYLINDER OR PISTON RING?

When Engine Lacks Power and Compression Is Poor Make Examination.

(By ERWIN GREER, President Greer College of Automotive Engineering, Chicago.)

There is nothing mysterious about piston rings used in automobile engines, even though repairmen will tell you that new rings of a certain sort will elevate your engine into some new state in which it produces twice as much power and speed as before. There is a good deal of misinformation about piston rings, and because of it automobile owners spend millions each year for such parts; in many cases getting no results from the expenditure.

Piston rings are supposed to pack the cylinder, so that the gas does not leak downward and oil upward. In order to be an ideal device it must do this without exerting too much pressure against the cylinder wall, and the pressure must be evenly distributed all around. The ring must fit the cylinder perfectly; it must sit in its grooves in the piston so that it will be neither too tight nor too loose.

Find Cause of Trouble

Such piston rings will run perhaps 20,000 or 30,000 miles, but a time must come when the rings no longer make a gas-tight joint. It then is necessary to find out why the rings no longer fit well. The average repair man will tell you that when wear takes place only the rings become worn, so that all that is necessary to put the engine in first-class shape is to replace the piston rings. How the repair man knows is one of the mysteries of this world. The fact is that no one can tell whether the rings are worn or whether the cylinders are worn, or just what the condition of these parts is unless the parts themselves are examined and measured.

This explains a great deal of trouble which owners have, because so-called overize rings were installed in the cylinders. In the first place the cylinders should be made true, either by grinding or some other process, and new rings obtained to fit the new bore. In this way only can one be sure of a perfect fit. To say that new rings will lap themselves into an oval bore is wrong for they will not, nor will new rings in worn cylinders make the shape presented by score marks or hard spots in the cylinder metal.

Rings Do Not Fit

When your engine lacks power, when the compression is poor, when it pumps oil and uses too much fuel, it usually is a sign that the rings do not fit properly, but it is not a sign that new rings alone will cure these troubles. You must find out the condition of the cylinders into which the rings fit. This means the grooves must be true in a lathe to the exact size of the new ring.

Emergency Reflector Is

Valuable in Repairing

A valuable trick of the trade, consists of carrying a large sheet of white pasted on somewhere under the car—under the rear seat or under the innervent carpet or in the curtain behind the rear deck. It can be kept in the sheet folded in half, so that one side remains fairly clean.

If you ever have a night job under the car this white surface will reflect the surprising amount of light from the head lamps or spotlight. By means of a little manipulation you can reflect splendid light around a tire that needs changing, or into the engine compartment in an emergency.—Motor.

Garage on Ground Floor

The automobile garage at the rear or side of the house is passing out of style. Better class homes erected nowadays have the garage built in the ground floor. This can be done without marring the appearance of the residence in the least; saves expense, and makes the garage much more convenient.

Defect in Ignition

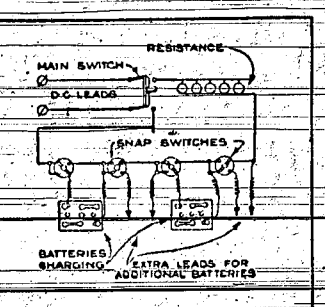

A mysterious cause of misfiring of an engine, is that of an internal break in ignition wiring. It is only when the broken wire is moved about, bringing the broken ends into contact and thereby improving the running of the engine, and by replacing the broken cable with a new one that the trouble is remedied. The insulation of a defective cable may be in good condition even at the point where the wire within is broken, making it doubly hard to locate.

Use Your Third Brake

"Do not forget that your car has three brakes. Put the gears in second, cut off the spark and steep grades will have no terror for you," says George Stowe, president of the Mitchell-Motor Car company of New York. "Shut off your motor and slide into second as you roll across the ridge. Don't drive in second. Shut off the spark if the throttle will not close. Then if you have a 'six' you gain six compression brakes and your motor cools to boot. It is necessary a gentle touch of the service brake now, and of the emergency brake then, generally will hold you nicely. At times the abrupt or long drop will argue for low instead of second in compression. On all but the steepest descents this will hold your car with but very little use of brakes. It will keep your brakes in reserve for real emergencies such as a motorcycle shooting around the curve on your side of the road or some similar hair-raising episode."

Arranging Switches for Convenience in Charging

When a garage makes a practice of charging storage batteries, use is generally made of a motor-generator set, or a rectifier with a number of cells charging in series. The arrangement of switches shown in the drawing will be found very useful for cutting batteries in or out without interrupting the current.

Battery-Charging Switches.

The circuit for more than a second. Snap switches, such as used for the two-position control of electric lamps, are used and are connected to the circuit in the manner indicated. To insert a new battery into the circuit it is connected to the pole of the battery leads, and a single turn of the switch instantly cuts it in.—Popular Mechanics Magazine.

Automobile Hints

The first requisite, before painting a car, is to have the surface thoroughly cleaned.

Never screw electrical connections down with the fingers, as a tight joint cannot be made.

Every bearing needs additional care in the summer to keep dust out and the lubrication in.

Pistons must run practically airtight in the cylinder, otherwise power is lost by escaping gas.

When grinding valves care must be taken to see that none of the compound works into the cylinders.

Thin Chinese still are walkers. It is shown by the fact that 20 factories in Canton make rubber soles and not one plant makes rubber tires.

In Ohio, 87 bills directly affecting automobile owners were introduced in the legislature, but only one which was passed—increased the tax on trucks.

More than 54,000 motorists were convicted of traffic violations in New York city last year. Of these, 5,280 served jail terms of from two days to six months. Nearly half a million dollars was collected in fines.

A few drops of water in the carburetor will sometimes cause a sudden momentary stalling of speed.

Never turn the steering wheel while the car is standing still, as such a turn puts unnecessary strain on all steering gear parts—and it is bad for tires.

Drain out all old oil in motor and replace with clean oil every 500 miles. Always make sure gauge registers proper level and that pressure gauge indicates properly.

MAKING GOOD IN A SMALL TOWN

Real Stories About Real Girls

By MRS. HARLAND H. ALLEN

(© 1924 Western Newspaper Union.)

TEACHING FOREIGN-BORN TO SPEAK "AMERICAN"

WHEN making good means making money, try teaching foreigners to speak the English language.

Ambitious foreign born men anxious to make good in business; foreign born mothers, whose children are growing away from them; foreigners who can't speak a word of English and foreigners who merely want to improve their speech—all these will be your prospective pupils.

So says a girl who, after graduation from college, spent a year's year wondering "what on earth" she could do, since she didn't want to teach in the public schools, in her home town. "The fact that there is a large element of foreign born people in here gave me my idea," she told me. "And I've made a good income ever since I started on my own to give these people private lessons in English."

Since every small town is a part of the "melting pot" which is America, no matter where a girl lives, she is almost sure to find a good number of the foreign born who flock yearly to our shores. Here are her pupils. As for desks, chairs, blackboards and other customary school-room accessories, she needs none of these to be "school ma'am" in this kind of school. The lessons are all private ones, and may be given at the pupil's own home.

The would-be teacher should advertise for her pupils in the local papers. To those who answer the advertisement, she may say that the charge for each two-hour lesson is three dollars, and that two a week will probably be satisfactory. Of course, she may vary the price to meet the local situation. She should supply herself with good text books, and should keep her advertisement running. If she obtains, eventually, more pupils than she can manage, she may then branch out and hire other teachers to assist her.

However, big her business grows, she should never give group lessons. Instead of private ones, for it is the element of privacy that will make her a success. The foreigner who has learned to speak English in his English home does not want to display his ignorance before a class. He wants private lessons. Even if the teacher should organize a class and persuade him to join, he will, in most cases, soon drop out.

There are very few towns where the foreign element in the population is negligible, and the girl who does happen to live in such a town should go into something else. But for the girl whose "Main Street" has its foreign sections, the risk is small, the possibilities great.

THE "CIRCULATING STENOGRAPHER"

"I HAD always wanted a business career," said the small-town girl whose mother was too feeble to be left entirely alone, "so I decided to be what I call a 'circulating steno.' Since circumstances prevented my taking a regular job, I have several employers instead of one."

This ingenious "circulating steno" used herself for the work by means of a correspondence course. She lists the different villages on her list, and takes a train each day. She makes it a point to be at each office on schedule time, and, since her employers know she can be relied upon to do so, she is seldom kept waiting; her promptness conserves her own time, well as theirs.

For the small-town girl who cannot leave home all day, who knows or is willing to learn, stenography, here is an opportunity. Business men who do not have enough work to be done to justify their employing a full-time stenographer will welcome a part-time stenographer.

If she does the housework before she starts to work each day, she will probably leave home in the mid-morning and return in the mid-afternoon. She can type her letters at home, getting them done easily before six o'clock. She can sign and mail them in the evening. Should any one of her employers discover additional letters he wants sent out the same day, she can take his dictation over the telephone. In her home "office," she should keep supplies of stationery from each place of business she visits.

"The way to begin is to begin," simply calling on and applying to those business men whose work she thinks might justify their having some stenographic work done, but probably not full-time work. Some friend of the family may need a little stenographic work done regularly; he may be able to suggest her name to other business men who would be glad of her services.

She may enlarge her field, as more business men hear and approve her plan, by employing other girls to work under her. She would have them report each day at her headquarters, assigning them either to offices on the regular route, or to business men who may have telephoned to have a special piece of work done. There is a big future for the "circulating steno" with ambition.

First Sheet of Paper

It is said to have been definitely settled that the first sheet of paper was made by Tsai Lun, a scholar and humble resident of China, in the year 75 A. D. Prior to that, tablets of bamboo and a stylus were made use of, but he believed that something better could be arrived at and spent 80 years in perfecting the process of making paper. Forty years after this achievement, he was raised to regal honors with the title of marquis.

Insulin Valuable in Malnutrition

Insulin injected into the blood stream of an undernourished infant will help to utilize the sugar in the food given, Dr. W. K. Marriot of St. Louis reports to the American Medical Association.

A malnourished child needs more food in proportion to its weight than normal children, but sometimes the malnourished child lacks ability to take care of all the food it should get. Glucose, the sugar of corn syrup, is injected into the veins along with insulin. Children using this food so strangely taken in, increase in weight, which is not lost later when the treatment is discontinued.

Doctor Marriot used insulin after observing that diabetic patients on insulin treatment often gain weight at a phenomenal rate, even when their food intake is not excessive. He used the treatment for infants only in the worst cases of malnutrition.

Not Satisfactory

Mr. Smith and Mr. Jones, wardens of a prominent city church, were not in accord concerning the new rector's introduction of extreme ritual into the service.

Mr. Smith was aggressively on the rector's side, Mr. Jones quite the reverse, and on one occasion their difference of opinion cropped out in a lively, though brief dialogue.

Mr. Smith, having exhausted his arguments on his irresponsible brother warden, said:

"At least you will own that art is the handmaiden of religion."

"Yes," returned Jones, smiling, "and I wish religion would give her a month's notice!"

Embarrassing Offer

My little niece, who accompanied me to the dentist several times this summer when I was getting my set of teeth, when a large box of caramels at our church fair recently. Trying to stop her from eating so many, I said, when she offered me some, "No thanks, dear, they're bad for the teeth." When in a loud, shrill voice, before a lot of people standing in front of my booth, she replied, "I must have sugar for you, Auntie, while you cut 'em." Correspondence, Kansas City Times.

Mankind's Use of Metals

Gold was probably the first metal to be used by man. Metallic gold was found in the beds of streams. It was used for ornaments before any other metal was discovered. The first metal put to practical use was copper, made into knives and other implements at least 5,000 years ago.

Prehistoric Dentistry

Bonechisel (the patient)—Will you give me an anesthetic, doctor? Doctor Subertooth—Sure! One wallop on the jaw with this stone mallet and you'll sleep till I get this tooth dug out.

Reformed Him

"I only married you to reform you," "You succeeded—I'll never do it again."

Grasp no more than your hand can hold.

He who sings frightens away his ilk. Cervantes.

Let children play as they please. If there is no danger of break a leg.

An in-growing habit is "knocking." It soon becomes interperate.

How the Motor Industry Set the Pace for Highway Building

The "horseless carriage" of yesterday is now being produced as the modern automobile at the rate of 4,000,000 a year. The total number of motor vehicles registered in the United States is over 16,000,000.

And automobiles built today are more than ever capable of economically serving both business and recreation needs.

But there is an obstacle standing in the way of their maximum service to owners.

For while the automobile industry made paved highways an economic necessity, the mileage of such roads is today years behind the requirements of modern traffic.

Happily motorists everywhere are boosting for more and wider paved highways.

And extensive experience has taught them that Concrete Highways are one of the best all-around investments they can make—an investment that pays big dividends.

As one of our 16,000,000 motorists you know better than anyone else the need for more and wider Concrete Roads. Start now to help your local officials provide them.

You can be sure there's longer wear in shoes soled with USKIDE

NOW you can be certain of getting shoes that will wear longer.

Be sure they are soled with USKIDE—the wonder sole for wear.

Then just try to wear them out! USKIDE fights wear. Will wear twice as long as best leather, often longer.

And it is comfortable, healthful, waterproof and anti-slipping.

USKIDE soles are being used by many shoe manufacturers who want to give their customers the most for their money by putting longer wear into their shoes.

USKIDE is saving money for hard walkers and workers everywhere.

Have your shoe repairman put USKIDE soles on those shoes that get the hardest knocks. USKIDE will stand the gaff.

Genuine USKIDE has the name USKIDE on the sole. Look for it.

FARM BUREAU NOTES

R. H. BARRY
County Agricultural Agent

SCIENCE AND THE FARMER

The Farmer's Cattle

Bovine (cattle) Tuberculosis. The following is an exact reprint of a circular issued Sept. 1, 1924 by the Bureau of Animal Industry, State Department of Agriculture, Lansing, Mich.:

Do You Know?

That Tuberculosis in cattle is a menace to the livestock industry of Michigan?

That Tuberculosis of animals is communicable to human beings?

That the time to eradicate this disease is now while the percentage of infection is low in Michigan as compared to some of the other states?

That the percentage of Tuberculosis in Michigan cattle is lower than in any of the dairy states. Twenty seven per cent of all the cattle in the state were tested last year with only 2.2 per cent reactors.

That one county in an eastern state has 80 per cent of tuberculous cattle and it is estimated that \$5,000,000.00 will be required to eliminate the disease in that county alone.

That the annual loss from Tuberculosis in livestock in the United States is between \$40,000,000.00 and \$60,000,000.00 and this loss is indirectly borne by the farmer.

That seventy trainloads of forty cars each of hogs and cattle are condemned for tuberculous at five of the largest packing centers every year.

That 25,000,000 pounds of Tuberculosis meat were destroyed last year.

That a nice fat cow may be a spreader of Tuberculosis.

That milk from clean, healthy cows is absolutely essential to proper nourishment and growth of children.

That milk from tuberculous cows, unless properly pasteurized, is dangerous.

That a large per cent of tuberculous children contracted the disease from milk of tuberculous cows.

That at least 2,000,000 people in the United States are active cases of Tuberculosis.

That at least 100,000 persons die annually from this disease in the United States.

That the army of hunchbacks and lame children is a living argument against the tuberculous cow.

That we have absolutely no right to neglect a condition that causes suffering and death among children.

That many of the chicken flocks in Michigan are tuberculous.

That a large per cent of hogs in

Michigan are Tuberculous.

That you should test your cattle—cull your flocks—and test your breeding hogs.

That the State of Michigan as well as every other State in the Union is a member of the International Convention for the control and eradication of this disease.

That 300,000 cattle were tested under this plan in Michigan last year.

That 45 counties in Michigan have appropriated \$230,000.00 to co-operate in this work.

That an intensive campaign covering the State as rapidly as possible is the cheapest way to control and eradicate this disease.

That when the area work is started in a county the test becomes compulsory.

Test your herds, cull your flocks, test your breeding hogs, eradicate tuberculous. It can be done.

For further information address:

U. S. S. Inspector in Charge, Tuberculosis Eradication, State Office Bldg., Lansing, Mich.

FRANK CHANCE, CUB LEADER, DIES

Successor at His Los Angeles Home

After Lingering Illness

Los Angeles, Calif.—Frank Chance, famed as the peerless leader of the Chicago Cubs when they won four pennants in 1906, 1907, 1908 and 1910, and two world's championships in 1907 and 1908, when the Detroit Tigers opposed them, collapsed and died in a Los Angeles hospital Monday night.

He has been ill ever since last spring, first diagnosed as a sinus and later a complication of diseases, compelled him to resign his post as manager of the Chicago White Sox.

U. S. Owns \$1,542,655.511 Real Estate

Washington—Exclusive of the "public domain" and the national parks the United States government owns real estate valued at \$1,542,655.511 according to the Federal Real Estate board. The total is some millions of dollars less than the amount reported last year, due to a reappraisal. It was stated that under the administration of the Real Estate Board, Federal agents no longer hire outside space and property while available government space and property stand uncultured.

MICH. GAME ASS'NS TO MEET IN GRAND RAPIDS OCT. 7.

Perhaps the most important gathering of sportsmen in Michigan will occur on Tuesday, Oct. 7, when the annual convention of the Michigan Game Protective Association is called to order in the Pantiand hotel.

Headlined by the personal appearance of John B. Burnham of New York, president of the American Game Protective Association, the congress sessions are being planned to be the most interesting and at the same time the most beneficial in the brief history of the Association.

Chief among the things to be discussed by the 500 or more delegates and sportsmen who are expected to attend will be a general revision of the Michigan laws, providing more protection for certain species of fish and small game. The Congress, it is planned will take steps to increase non-resident and alien hunting and fishing licenses. Also a discussion of proposals for lowering the bag limit on all species of bass and pike to five in a day, is expected to result in some concerted action toward further preserving the stock of these fish in the state.

Lowering the bag limit on all species of trout, a feasible tag system for protection of partridge, a closed season for brown and black bear, the prohibition of spears, and general prohibition of all kinds of fishing from April 1st to June 15th, are other suggestions that will be brought before this Grand Rapids meeting.

Mr. Burnham, the distinguished sportsman, is making his first public appearance in the State at this function. He will address the sportsmen at a banquet to be tendered the delegates and sportsmen at the hotel during the evening. Other speakers of state importance in sportsmen circles will be on the program.

The plans now being made by the entertaining body, the West Michigan Game and Fish Protective Association, call for caring for 500 guests. There are 75 member associations in the Congress and each is entitled to one voting delegate.

The Michigan Congress was born in Grand Rapids three years ago with a membership of 18 associations. Now there are more than 75 member associations and now applications are expected at the coming convention.

Sin Not Against Own Soul

Never let a man imagine that he can pursue a road and by evil means, without sinning against his own soul. The evil effect on himself is certain.

Sourcery

FUNCK SCHOOL NOTES.

An investment in knowledge always pays the best interest.—Franklin.

Georgia Clover was absent all of last week.

The parents visited school on Wednesday. The county nurse spent the afternoon at the school.

Ethel West was at school Monday. Robert Funck was absent Monday because of illness.

CARD OF THANKS.

We sincerely wish to thank one and all for the kindness and sympathy in the death of my husband. Also for the grand sermon preached by Rev. Hart, and the music by the choir, also the beautiful floral pieces given by neighbors and friends.

Mrs. John Roberts.
Mr. Asa Baxter.

MORTGAGE SALE.

Whereas default has been made in the payment of the money secured by a mortgage dated the 27th day of November, 1915, by Lafayette B. Merrill and Sarah Merrill, husband and wife, which said mortgage was recorded in the office of the Register of Deeds of the county of Crawford, in Liber 1 of Mortgages on pages 161, 162 and 163 on the 30th day of November, 1915, at 3 o'clock in the afternoon.

And Whereas the amount claimed to be due on said mortgage at the date of this notice is the sum of \$1309.98 in principal, interest, and taxes, and no suit or proceeding having been instituted at law to recover the debt now remaining secured by said mortgage or any part thereof, whereby the power of sale contained in said mortgage has become operative.

Now, Therefore, notice is hereby given that by virtue of the said power of sale and in pursuance of the statute in such case made and provided, the said mortgage will be foreclosed by a sale of the premises there-in described at public auction to the highest bidder at the front door of the court house in the Village of Grayling in said county of Crawford on the 29th day of September next at 1 o'clock in the afternoon of that day; which said premises are described in said mortgage as follows, to-wit: West Half of the Northwest quarter of section 21, Town 25 North of Range 3 West, Crawford County, Michigan.

Dated June 27, 1924.

Farmers State Savings Bank.

401-407 Shearer Building,

Bay City, Michigan. 7-318

NOT REPEATING HIS NAME

Mother (lightly dead)—Why is daughter always repeating her husband's name when she's with him?—It's Jimmie. Jimmie, Jimmie, all the time!—Don't you see all those mother-in-laws, glumme, glumme, glumme, all the time.

A VERY POOR SHOT

Wife—It says here a Chicago policeman is a wonderful marksman—killed two crooks at once.

Hubby—Poor shot.

Wife—What?

Hubby—Yes as crowded as that town is with crooks he ought to have hit a dozen at least.

LEGAL AND CHARGEABLE

His client—They told me at your office that you were out on legal business and here you are on the links.

The Lawyer—Perfectly legal, sir, and entirely permissible. The charge for my opinion on the subject is twenty-five dollars.

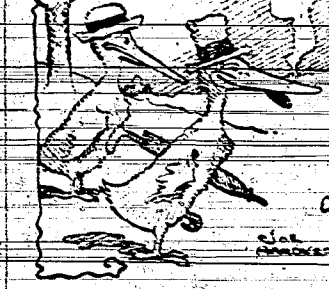

JEALOUS? OH, NO!

She said I will be quite content.

He—Well, I'm just shocked that to claim so.

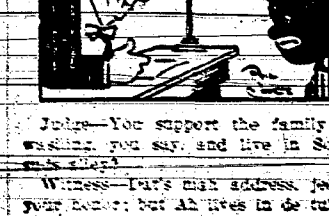

CAUSE FOR JOY

"What makes you look so pleased?"

"I was told to a revelation."

LIVES IN THE TUB

Judge—You support the family by washing your soap and live in Soap.

Witness—That's his address, Judge, your honor, but Al lives in the tub.

ALAS

Box—If you're going to end it all at least pick out a well with clean water in it.

Seasawed as Remedy.

Chinese doctors have been successful in curing certain skin diseases with extracts from seaweed. Experiments in this direction are now being carried out in Paris and other European cities.

First Meerchaum Pipe.

The first Meerchaum pipe was made 20 years ago by a Hungarian shoemaker who was a clever vent carver.

Man's Mind Ever in

Abject Grip of Fear

Primitive man began his existence on earth under conditions that caused his hair to stand on end a dozen times in the day of thrilling adventures. When he looked around him it was with an anxious, watchful eye for enemies, and an ear strained to catch the howlings of strange beasts.

It was with reluctance he surrendered his consciousness at night for there was no security about his rude couch. He looked up at the sky with no sense of friendly aid to be sought there, but rather with craven dread of some malign intent in the strange movements of the stars and in the periodic appearance of flaming comets.

Man lived for countless ages with fear at his elbow, and the centuries of his advance in knowledge and culture have not enabled him to rid himself of the monster, says E. V. Otte in P. T. S. and Cassell's Weekly.

One result of this is that the language of almost every civilization abounds with taboos and superstitions, while even a good many of the sayings of the great are colored with the emotions of fear.

Science has disposed of superstition, but it has come to understand only a very little more about the emotion of fear. It is only by his head and in his heart that man is sometimes a hero; in the pit of his stomach he is always a coward. Physiologically, the emotion of fear hits us very literally below the belt. It affects the great network of nerves situated under the diaphragm and known as the solar plexus. These nerves are closely associated with all the most vital organs and they control the very-plot upon which the human mechanism works. Hence, the "sinking feeling" that we experience in moments of fear is due to an actual relaxation of the diaphragm itself and the consequent embarrassment of the heart and the pulmonary system.

Science has also discovered that the sense of fear, when it becomes intensified, tends to produce a well-marked condition known in medical terms as a phobia. There are agoraphobia or fear in crowds; monophobia, or fright of being in a confined space; anthropophobia, or fright of society; bathophobia, or fright of things falling; siderodromophobia, or fright of railway traveling.

Tells a Pathetic Story

It is a two-inch strip of cigar-box wood, with a half-inch hole rudely whittled through it at one end, and with soiled strings of cloth attached. It occupies a place in the collection of curious things in the office of Dr. Sydney Ussher, the chaplain stationed by the Episcopal City mission at the City home on Welfare Island.

The whittled hole, Doctor Ussher explains, was once filled with a glass lens from a broken pair of spectacles, and the strings of cloth were used as ear buds. An old inmate of the institution, who had lost the use of one eye entirely and was almost blind in the other, had laboriously contrived a home-made eyeglass in order that he might not lose touch with the news of the big city across the river.

"It is a pathetic story," said Doctor Ussher, "to help with little personal problems that the city cannot look after. The city provides good medical talent and excellent nursing care for our old folk, but the cost of eyeglasses has never been included in a municipal appropriation.

"Sometimes I am asked to play the part of a semi-professional oculist in the hope that the long days may be made a little less dreary for the poor people whose lives are ending here."

Was in the Star.

Law Fixes Teachers' Pay.

Every state has laws definitely prohibiting discrimination between men and women teachers in the matter of salary, and some other states have by administrative action recognized the principle of "equal pay for equal work," according to information recently compiled by the United States Bureau of Education, says School Life. Those states which have passed prohibitory laws are California, Colorado, Maryland, Nevada, New York (for New York City), Oregon, Texas, Utah, Washington and Wyoming.

Made Walls of Ice

Ice as masonry has made possible the sinking of a mine shaft through 6000 feet of swamp to reach deposits of coal in northern Belgium. Workmen were handicapped by walls of the shaft caving in until the walls were frozen into solid ice. It is expected that the 40 inch coal beds in the newly discovered field will be made accessible through the use of refrigeration systems.

CAMPOR IS BIG SURPRISE

Everybody is surprised at the quick results from simple camphor, witch-hazel, hyacinth, etc., as mixed in Lavopik eye wash. One small bottle helps any case weak, strained or sore eyes. Aluminum eye cup free. A. M. Lewis, Druggist.

Freight Cars by Millions.

Rolling stock of all the railroads of the United States consists of 2,200,000 freight cars, 65,000 locomotives and 25,000 passenger cars.

NOTICE OF SHERIFF'S SALE.

Notice is hereby given that by virtue of a writ of execution issued out of the circuit court for the county of Crawford, dated September 11th, 1924, in favor of Paul E. Dinsmore, plaintiff, against the goods, chattels and real estate of Ed Feldhauser, defendant, in said county to me directed and delivered, I did, on September 27th, 1924, levy upon and take all the right, title and interest of the said Ed Feldhauser in and to the following described real estate, to-wit:

All that certain piece or parcel of land being and situated in the Township of Maple Forest, county of Crawford and State of Michigan, to-wit:

The west one-half (1/2) of section twenty-eight (28) of township twenty-eight (28) north, range three (3) west containing eighty (80) acres more or less, according to the government survey.

All of which I shall expose for sale at public auction to the highest bidder at the front door of the court house in the village of Grayling in said county, (that being the place of holding the circuit court for the county of Crawford) on the 15th day of November, 1924 at 1:00 o'clock in the afternoon.

Dated September 28th, 1924.

Peter F. Jorgenson,
Sheriff Crawford County.

LEGAL NOTICE.

The Manistee & Northeastern Railroad Company and the Michigan Trust Company, as receiver of said Railroad Company, hereby give notice that on the 5th day of September, 1924, they filed with the Interstate Commerce Commission at Washington, D. C., their joint application for a certificate that the present and future public convenience and necessity permit the abandonment of the railroad of the Manistee & Northeastern Railroad Company, which extends from Manistee to Traverse City by branches to Grayling, Empire Junction, Provenant, and Onkema, a total mileage of 182.56 miles, in Manistee, Benzie, Grand Traverse, Leelanau, Wexford, Kalkaska and Crawford Counties, Michigan.

Manistee & Northeastern Railroad Company and
Michigan Trust Company, Receiver.

Chamberlain's Catarrhal Deafness Tablets will also relieve you of your system of Catarrh of the Ear, Nose and Throat. Chamberlain's Catarrhal Deafness Tablets will also relieve you of your system of Catarrh of the Ear, Nose and Throat.

DUPLEX—a new name

—for a new type car you have never seen before!

A closed and open car combined—the advantages of both at an open car price!

STANDARD SIX
DUPLEX PHAETON

\$1145

A. A. HAWKINS

No other car in its price-range has this combination of features:

New Duplex Body.
Real Balloon Tires.
Inclined valve engine.

Crankshaft and connecting rods machined on all surfaces for vibrationless balance.

Genuine chrome tanned Spanish leather.

All the usual equipment—plus a high grade clock, a dash gas gauge, automatic windshield wiper and lighting switch on steering wheel.

New Studebaker 4-Wheel Hydraulic Brakes—optional equipment. Automatic braking power.

ONE minute the DUPLEX is a comfortable, weather-tight closed car—deeply cushioned and richly appointed. In less than thirty seconds it becomes a delightful open car, with all the unhindered freedom every motorist likes and enjoys. Its double utility satisfied a most urgent need—it is as revolutionary as the self-starter and electric lights.

And the price is the same as that of the open car—with advantages in finish, fittings, room and comfort no open car could ever give!

Framed and shaped in steel, the upper part of the Duplex Body is built integrally with the lower part—it functions perfectly with the lower part—it is permanently beautiful.

But even without the "double-value" of the Duplex Body the new Standard Six would still be the same great Studebaker success. For its introduction marks the beginning of an era in the automobile industry when fine cars of real quality, plenty of room and comfort, impressive appearance, splendid power and performance may be had at a price the average buyer can afford to pay.

Surpassing mechanical superiority is obvious in every mile you drive it. Power, smoothness, silence you expect in any good six-cylinder car; but in this great car your expectations will be exceeded. You cannot anticipate such performance-perfection in any car even within hundreds of dollars of the new Studebaker Standard Six price.

The proof is easy to establish—drive it yourself, try it out on your favorite hill, test its speed on the straight-away. Sense what "ease of operation" really means in terms of effortless steering, velvety clutch action, easy gear shifting and instant brake application.

Experience what real comfort means in plenty of room, soft deep cushions; genuine balloon tires; long, supple springs.

The new Standard Six will tell you a story as it has never been told before by any other car at the Standard Six price.

Whether you are in the market now or next year, you should see this new Studebaker. It is a car that will revolutionize values in the automobile industry!
